Office Action Summary	Application No. 10/788,973	Applicant(s) CHYC ET AL	
	Examiner Mike Fatahiyar	Art Unit 2629	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 14-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 14, line 6, there is no clear antecedent basis for "the user". Correction and/or clarification is required.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 and 8-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Kodim(6,094,190).

Kodim discloses an input device for controlling a position of a cursor on a display device comprising a core(7), a flexible track(8), a first input detection means(11) which is a turns encoder, a depressible component(13), a second tactile input detection(14) which all function as claimed.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 2629

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4-7 and 14-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kodim in view of Will(5,825,353).

Kodim is discussed above. Will is cited to show that the concept of utilizing a rotatable input device disposed on a peripheral edge of a portable hand held electronic device having a processor(10) for navigating and controlling a selection function on a display(13) is old. Thus, it would have been obvious to one of ordinary skill in the art to modify the system of Kodim with the noted teachings of Will such that to position the rotatable input arrangement of Kodim on a peripheral edge of a hand held portable electronic device having a display device for navigational and selection functions because both references are related to a rotational input device for a computer for controlling an image on a display screen.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dorst, Culver, Shaw et al, Culver('938B1), Mackay, Clark and Shiff are made of record to show various types of rotatable input devices for controlling a displayed image on a display device.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mike Fatahiyar whose telephone number is (571)272-7688. The examiner can normally be reached on Monday-Friday from 9:30 to 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Hjerpe, can be reached on 571-272-7691. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
